

INSTRUCTION MANUAL

SOLAR LIGHT

INSTALLATION:

1. Find all loose parts if any and join them together into one assembly.
2. See which type of power switch you have:
 - a. If you have a solar light with this type of switch, make sure the switch is in the "off" position. Before you place them into the yard or garden.
 - b. If you have a solar light with this type of switch, leave the tag in. With the tag in, the power switch is in the "off" position. Removing it the unit will be turned "on".
 - c. Standard "on" and "off" switch.

3. Find location(s) as to where you wish to place the light(s) and make sure there are no surrounding shades or light source that will affect the solar light.
4. Place the light(s) into ground in the early morning with the power switch "off", to allow the unit to absorb a full day worth of sunlight (power charge).
 - a. If you have solar light with "b" type switch, please remove the tag before placing them into the ground.
5. Push the lights into the ground at the stake area, and not from the top of the unit.

USER GUIDE:

1. It is recommended to clean the solar panels with a damp cloth on a regular basis.
2. Solar lights are weatherproof, but during winter or cold temperatures (below 0°C/32°F), it is best to remove them and wait until the extreme weather dissipates.
3. If the light does not turn on in the evening, do the following:
 - Check the surrounding area for high ambient lights, such as porch lights, streetlights, etc.
 - Make sure the switch is at the "ON" position
 - Make sure solar panel is not located in a shady area, where sunlight is not reaching the unit.
 - Make sure the batteries are making contact with the terminals. (See "REPLACING BATTERIES," to learn how to access battery area.)

REPLACING BATTERIES:

1. Find the battery compartment; it is usually located underneath the solar panel.
 - a. May require the use of a Philip screw driver.
2. When removing panels, be careful with the wiring inside.
3. Once inside the unit, remove the battery or batteries and replace with similar specified type.
4. Should you have any other questions in regards to "REPLACING BATTERIES", please do contact our Customer Service Department.

Please make sure you use the same type and size of rechargeable batteries as you received with the product.
